TITLE : VIDEO RECORDING METHOD,
SYSTEM THEREFOR AND
RECORDING MEDIUM THEREFOR

ABSTRACT : PROBLEM TO BE SOLVED: To provide a method/system for recording a program desired by a user corresponding to image contents in the case that the start/end time is set regardless of program contents, in the case that detailed program contents are not notified or in the case that the schedule of the program is changed.

SOLUTION: By automatically collating the face of an appearing person in video signals with a data base and performing control so as to record or not record frames before and after the appearance of a desired person, recording is performed.
